RTC gives inside scoop on the latest in transportation developments in new blog *As part of more user-friendly website, new blog offers behind-the-scenes look into the RTC*

[Click to Tweet](#): All access granted! @RTCSNV launches a new blog with insider's look into all things transportation and what it all means to you: <https://www.rtcsnv.com/news/category/blog/>

LAS VEGAS – As part of the agency's newly redesigned website, the [Regional Transportation Commission of Southern Nevada \(RTC\)](#) is launching a [blog](#) to keep Southern Nevadans updated about developments in transportation, from traffic management and transit to regional planning and innovation, information that may not be widely known but has a great impact on the community. The blog will offer a behind-the-scenes look and an engaging perspective on all the RTC is doing to improve transportation and residents' daily commutes through new services, projects and technologies.

"Everyone depends on transportation – cars, buses, bicycles – yet they may not realize what is going on behind the scenes to improve their commute, enhance safety and reduce congestion," said MJ Maynard, RTC Deputy Chief Executive Officer. "We want the community to better understand what we do, how we do it and why we do it. With the blog, we can tell these stories in a fun yet informative way."

Transportation continues to evolve just as the Las Vegas Valley continues to grow. To address the challenges that accompany these changes, the RTC has taken a proactive approach to create forward-thinking plans, test and implement cutting-edge technologies, undertake critically needed projects, and offer helpful services. Now with the blog, the RTC can communicate directly with Southern Nevadans on what it is doing, how it affects them and their families, and why it will improve the community overall. For example, the new blog recently highlighted the testing of [electric buses](#) over the summer and the project to install [bollards at 20 bus shelters](#) to increase public safety.

The [blog](#) can be found in the newsroom section of the RTC's redesigned website. The RTC [online newsroom](#) is an informative outlet with various tools and materials, including press releases, photo libraries and videos. The new website also offers translation into numerous languages of all blog posts and newsroom materials. To explore the new website, visit rtcsnv.com and [subscribe](#) to the blog.

About the RTC

The RTC is the transit authority, transportation planning organization, regional traffic management agency and administrator of Southern Nevada Strong, the regional planning effort for the Las Vegas valley. The RTC's vision is to provide a safe, convenient and effective regional transportation system that enhances mobility and air quality for citizens and visitors. The RTC encourages residents and visitors to use a variety of transportation choices to help reduce traffic congestion, clean the air and improve the quality of life in Southern Nevada. For more information about the RTC and its major initiatives or to download its transit app rideRTC, visit rtcsnv.com and stay informed by [subscribing](#) to our [blog](#).
